

I support the NJ "Do Not Call" law, and am concerned that the FCC would interfere with the rights of our state to pass a law to protect ourselves from unwanted intrusions on our privacy. When we SIGN UP to request that we not be called, our choice should be respected. If we wanted to deal with a specific business, we always could choose to contact this business. (The law does not hinder this.) Otherwise, it is wrong (and unconstitutional) for the FCC to overturn New Jersey's law and the choices made by its citizens. [Note the 4th and 10th amendments of the U.S. Constitution!]
